Shah Redwan Ahmed

Software Engineer | *CTO & Co-Founder*

@ sahmed221241@bscse.uiu.ac.bd | LinkedIn | GitHub | </> HackerRank | Dhaka, Bangladesh

Education

United International University — Dhaka, Bangladesh

B.Sc. in Computer Science & Engineering; ***CGPA: 3.42/4.00*** — *Coursework completed, 2026*

- Final Year Design Project: ResQTech, a drone-based flood detection system (2nd Runner-Up, UIU CSE Project Show 2026)
- Active in competitive programming, web development, and community teaching

Experience

FazeSoft — Remote

CTO, Co-Founder & Software Engineer — *Jan 2024 – Present*

- Lead technical decisions and hands-on development for more than 12 client web applications for UK and Bangladeshi businesses
- Manage a development team and run sprint-based Agile workflows from planning to delivery
- Shipped production systems including property management, e-commerce, logistics, and booking platforms

Freelance (UpWork & Local) — Remote

Full-Stack Developer — *Oct 2023 – July 2024*

- Delivered end-to-end React frontends with FastAPI/Express backends for client projects
- Integrated REST APIs, configured auth flows, and deployed production-ready code on tight deadlines

Skills

Languages: JavaScript, TypeScript, Python, C++

Frontend: React, Next.js, Tailwind CSS, HTML, CSS

Backend: FastAPI, NestJS, Express.js, Next.js API Routes, REST API Design

Databases: PostgreSQL, MongoDB, Supabase, Redis, MySQL

Tools & DevOps: Git, GitHub, Docker, Linux, VS Code, Figma, Vercel, Netlify

Problem Solving: Data Structures, Algorithms, Competitive Programming

AI-Assisted Development: Claude Code

Awards & Achievements

Best Code Quality, UIU HackDay 2026: (Team: One Last Time)

- Delivered clean, readable, and well-documented code under time pressure with clear separation of concerns
- Kept a strong project structure and clear naming, choosing correctness and scalability over quick fixes

2nd Runner-Up, UIU CSE Project Show 2026: ResQTech, a drone-based flood detection system that locates affected people

- Built the FastAPI backend that connects drones to rescue teams: drone login, role-based access, alert logging, and live notifications
- Helped rescuers decide who to reach first by classifying the risk level of each person found

6th Place: Smart Bangladesh Programming Contest (2023)

HackerRank 5 Star rating in Problem Solving

HackerRank 5 Star rating in C++

Projects

Homenet (HomeNetBD) | *NestJS, Prisma, PostgreSQL* | *20% co-owner*

- Co-own a Bangladesh property marketplace that aims to reduce fake listings with a verified-listing process
- Set up the NestJS API (core modules, security guards, logging, Vercel deployment) and built saved properties, notifications, map address lookup, Google sign-in, and automatic pull request checks

Passtid | *Next.js, TypeScript, Stripe, Telegram* | *FazeSoft* | *In development*

- Designed and built, with Claude Code, a booking assistant for Swedish embassy appointments in London: users set the days and hours they can attend and see how busy each slot is
- Designed paid plans with Stripe Checkout and Telegram alerts; the interface is complete and the production backend is in progress

NeoScape Properties | *React 18, TypeScript, FastAPI, Supabase* | *FazeSoft*

- Built a property management platform for a UK property firm, with a public listings site, an admin workspace, and a tenant portal
- Replaced the firm's spreadsheet rent tracking and manual tenant onboarding with rent schedules and document management

WanderNest BD | *React, TypeScript, Supabase* | *Live*

- Main contributor (about 250 of 400 commits) to a travel platform where users plan custom trips and book tours, hotels, and flights in one place
- Gives Bangladeshi travelers one place to compare options, instead of searching across many sites

Shohay | *React 19, TypeScript, FastAPI, Supabase* | *Team project*

- Built features across the frontend and backend of a flood-relief platform for Bangladesh: citizens request help without an account, and coordinators verify requests and dispatch volunteers
- Added role-based sign-in with Supabase, a live drone monitor (merged from the ResQTech backend, so a person spotted by a drone can become a rescue request), and sandbox donations with SSLCommerz

RiverTyne LTD | *Next.js 16, MongoDB, Nodemailer* | *FazeSoft*

- Developed a 23-page website for a logistics company in four languages, with an admin panel for editing content
- Let the company update its own content without a developer

Manchester Villas (VillaEase) | *React, Django, Supabase* | *FazeSoft* | *Live*

- Built a booking website for a Manchester vacation-rental business: guests see live availability, book, and pay online, and the owner manages everything from an admin dashboard
- Replaced booking by phone and email

MediSecure | *React 19, FastAPI, PostgreSQL, Redis* | *University*

- Wrote most of a hospital system built to keep patient records safe: staff see only what their role allows, logins use secure cookies, and repeated requests are rate-limited

BazarLTD | *React, REST API* | *FazeSoft* | *Live*

- Built the storefront for an online store (products, cart, checkout) and connected it to the backend API
- Let a retail business sell online from product listing to checkout

+ Additional projects: Ideal Muslim Shop (e-commerce), HireMate (HR platform), and more

Certifications

HackerRank Certifications: Problem Solving (Basic & Intermediate), Python (Basic), JavaScript (Basic & Intermediate), SQL (Basic), CSS (Basic), Java (Basic), React (Basic)

Leadership & Co-curricular Activities

UIU Computer Club — Dhaka, Bangladesh
General Member — *Jun 2022 – Present*

- Active member participating in events, workshops, and programming activities

MindLeap Academy — Bangladesh
Campus Ambassador — *Mar 2024 – Present*

- Promoted bootcamps and workshops to students
- Helped drive event participation through campus channels

Edvoy Bangladesh — Bangladesh
Campus Ambassador

- Organized awareness sessions and shared scholarship opportunities with students

BAFSD Quiz Club — Bangladesh
Executive Member — *Jul 2018 – Aug 2019*

- Organized quiz competitions and school events

Areas of Interest

Technical Interests: Full Stack Development, Software Engineering, REST API Development, Mobile App Development

Problem Solving: Competitive Programming, Algorithm Design, Code Optimization
